—— best for digital printing ——

PROCESSING RECOMMENDATIONS

KATZ DISPLAY BOARD is a natural product. To reduce climatically caused paper problems or deviations to the properties of KATZ DISPLAY BOARD, we recommend the following:

STORAGE & PROCESSING RECOMMENDATIONS

Ideal storage & converting conditions:

- temperature: 18 - 22 °C (64 - 72 °F)
- relative humidity: 45 - 55 %

Storage:

- in dry, air conditioned warehouse
- flat in horizontal position
- no high temperature & humidity changes
- no direct sunlight

Before processing:

Leave originally packed product for at least 48 hours in the production hall.

Recommendation to process the board within 1 year from the time of production.

HANDLING RECOMMENDATIONS

Wearing white cotton gloves avoids fingerprints and protects the surface.

Hanging hangers must be slanted outwards.

Never hang signs with hangers slanted inwards.

Production residues or printed end products are 100 % recyclable in paper waste.

HALF THROUGH CUT

We achieved the best results with a static knife and an oscillating knife.

* All values are based on our experience and may differ from machine to machine.

V-CUT WITH GAP

* All values are based on our experience and may differ from machine to machine.

CREASING

Instead of 5 creasing lines, a creasing matrix can be used

Folding of 90° and more possible

* All values are based on our experience and may differ from machine to machine.

EOT: ELECTRIC OSCILLATING TOOL

TOOL

The EOT is ideally suited for cutting materials like KATZ DISPLAY BOARD. The high oscillating frequency makes it possible to cut at high processing speeds especially for fine, precise contours.

- Knife stroke: 1 mm
- Electric drive
- No cooling
- Compatible with G3, S3, L3

BLADE

Fine, robust blade with low overcut; designed to cut small radii and intricate detail.

• Z22

UNDERLAY

Uncoated MDF (Medium-Density Fibre-board): it's a fibreboard, which has a hard surface but doesn't affect the vacuum of the cutting machine.

- Thickness: 3.0 mm
- Strong underlay that doesn't support vibration of the cutting substrate
- Cheap and solid underlay as an alternative to the basic grey cutting felt (PLP)

POT: PNEUMATIC OSCILLATING TOOL

TOOL

The POT is an air-driven powerful and durable tool particularly well suited for cutting thicker KATZ DISPLAY BOARD (> 3 mm). Suitable especially for fine, precise contours.

- Knife stroke: 8 mm
- Robust, maintenance-free pneumatic drive
- No cooling
- Compatible with G3, S3, L3.

CTT2: CREASING TOOL TYPE 2 - USING C212 | 1.5 CREASE WHEEL

TOOL

The CTT2 is a universally applicable crease tool. The CTT2 is very good for processing KATZ DISPLAY BOARD 1.2 mm or 1.6 mm. It produces high-quality creases for folding KATZ DISPLAY BOARD.

- High quality clean creases
- Makes KATZ DISPLAY BOARDS foldable without cracking
- Directional pressure adjustments (with/against corrugation)
- Compatible with G3, S3

TOOL

The Double edge cut-out tool it's perfect for thinner through cutting and half through cutting materials like KATZ DISPLAY BOARD 1.2 mm & 1.6 mm. The use of this knives allows maximum processing speeds.

Very high cutting speeds.

BLADE

Burr free knives are designed for thin KATZ DISPLAY BOARDS. It gives a perfect finishing on one side of the cut part.

500-9804: double edge cut-out knife 50° burr-free
